Preface

Before continuing with this guide, it is assumed you have read the document titled '**EdShare User** guide: Uploading resources'. It is advised you read this document before proceeding as it will give you an understanding of how EdShare functions and how to upload resources to the platform.

Introduction

The purpose of this guide is to provide you (the reader) with an overview of how to embed multimedia files, e.g. video and audio within the institutions VLE Moodle using two different methods.

How to link to EdShare Multimedia files within Moodle

Resources that are stored within EdShare can be embedded or linked to Moodle. The differences between the two methods are:

- **Embedding** This produces a 'snapshot' of your resource within Moodle. Allowing them to interact with it without having to leave Moodle
- Linking Students can view your EdShare resource by clicking on a link within a Moodle course

To link to a resource within EdShare from Moodle, please go through the following steps

Step 1 of 3: linking to EdShare resources via Moodle

Within your resource manager, click on the resource you wish to link to and then right click on the Download button and select 'Copy link address'.

There is no preview avail	able for this file but you can do	wnload it.
Text	ne file	
	Download	
	Open link in new tab	
	Open link in new wind	low
	Open link in incognito	window
	Save link as	
	Copy link address	
	LastPass	•
	Inspect	Ctrl+Shift+I

Step 2 of 3: linking to EdShare resources via Moodle

Within Moodle (and with editing turned on) select **URL** from the **Resources** menu and click the 'Add' button.

Page **5** of **13** This work is created by Greg Walters for the University of Glasgow Library EdShare and is licensed under a <u>Creative Commons Attribution-Non Commercial-ShareAlike 4.0 International License</u>

Step 3 of 3: linking to EdShare resources via Moodle

Give your link a name, and within the '**external URL**' field, paste your copied link within this space. Provide a description for your link to inform users of its purpose and you can enable your link to appear in a new window if you wish.

ttps://edshare.gla.ac.uk/id/document/227	Choose a link
Paragraph 🔻 🖪 I 🗄 🗄 🖉 🖉 🖉	
ollow the above link to view a series of tutorial video	which show you how to use the equipment located within the main branch library.

After you have checked your URL fields, scroll down and click on the 'Save and return to course' button.

You will be returned to your Moodle course where you will see that a link to your EdShare resource has been created. Click on this to open your newly created link.

Library Equipment videos

Follow the above link to view a series of tutorial videos which show you how to use the equipment located within the main branch library.

How to embed EdShare Multimedia files within Moodle

Step 1 of 7 embedding multimedia files within Moodle

Before beginning, you will need to be logged into both EdShare and Moodle and have them both open for the entire duration of this tutorial in separate browser windows.

Within EdShare, click on the 'Source Code' button underneath your chosen video and copy the source code shown in the image below.

Embed	Source Code	Download
<video controls="controls
<source sro=" https:="" odshare<="" p=""></video>	" > e.gla.ac.uk/268/1.hasvideo_mp4	ThumbrailVersion /library
promo_007.mp4" type="video		
promo_007.mp4" type="video Your browser does not suppor	o/ogg" />	

Leave the browser window with your video within EdShare open, do not close this as we'll be returning to this shortly.

Step 2 of 7 embedding multimedia files within Moodle

In the text below, replace the three 'source src' instances with the EdShare ID of your chosen video

<!DOCTYPE html> <html> <body>

<video width="350" controls>

<source src="https://edshare.gla.ac.uk/268/1.hasvideo_mp4ThumbnailVersion/librarypromo_007.mp4" type="video/mp4">

<source src="https://edshare.gla.ac.uk/268/1.hasvideo_mp4ThumbnailVersion/librarypromo_007.mp4" type="video/webm">

<source src="https://edshare.gla.ac.uk/268/1.hasvideo_mp4ThumbnailVersion/librarypromo_007.mp4" type="video/ogg">

Your browser does not support HTML5 video.

</video>

</body>

</html>

Once you have replaced the three sources, copy the above text and paste it into a text editor, i.e. notepad and then save your text file as 'video_index.html'.

Take a note of the width of your video controls, this will be required later on

Ensure for your three source addresses, they begin with 'https' not 'httpss'.

Step 3 of 7 embedding multimedia files within Moodle

Upload your newly created 'video_index.html' file to accompany your video file within EdShare. Do so, by returning to your browser window with your EdShare video open and scroll down the screen and then click on 'edit Item' button/text.

Click on the '**Choose file**' button, select your HTML file and then click on '**Upload**' the button. You should now have something similar to the image shown below within EdShare.

Choose File No file chosen	Upload
Video library-promo_007.mp4 125MB	
	Show options
Text video_template.html 494B	🗞 🗐 🛧 🖊 🗊
	Show options

Scroll down and click on the 'Save and Return' button.

Step 4 of 7 embedding multimedia files within Moodle

You should now have an HTML file which accompanies your video file within EdShare.

Moodle should be open within your other browser window, log in (if required) and navigate to the course you want to embed your video into.

Within your chosen Moodle course, turn the editing on and click on 'Add and activity or resource'. Under 'Resources' select 'Label' and click on 'Add'.

Page **10** of **13** This work is created by Greg Walters for the University of Glasgow Library EdShare and is licensed under a <u>Creative Commons Attribution-Non Commercial-ShareAlike 4.0 International License</u>

Step 5 of 7 embedding multimedia files within Moodle

Click on the 'toggle toolbar' icon, to make sure the HTML editor is being displayed within the toolbar.

The toolbar within the Label, should now have the HTML editor button shown – click on this (highlighted in image below).

Page **11** of **13** This work is created by Greg Walters for the University of Glasgow Library EdShare and is licensed under a <u>Creative Commons Attribution-Non Commercial-ShareAlike 4.0 International License</u>

Step 6 of 7 embedding multimedia files within Moodle

Within the new HTML editor pop up, copy and paste the text shown below into it.

```
<iframe width="380" height="214" src=" " frameborder="1" allowfullscreen=""></iframe>
```

Once you've pasted the above text into the HTML editor within Moodle, a source will need to be added. To add a source, open the browser window with EdShare and select your video (if not already selected). Select the HTML file and then click on the '**Download**' text displayed on screen.

Now, copy the URL within the address bar

← → C Secure | https://edshare.gla.ac.uk/268/7/video_template.html

Paste the copied URL between the quotations (" ") within the text you pasted into the HTML editor.

Page **12** of **13** This work is created by Greg Walters for the University of Glasgow Library EdShare and is licensed under a <u>Creative Commons Attribution-Non Commercial-ShareAlike 4.0 International License</u>

Step 7 of 7 embedding multimedia files within Moodle

Within the HTML code editor, you can adjust the width and height of your video. If required you can use an <u>aspect ratio calculator</u> to calculate a suitable size for your video.

HTML source editor		🕢 Word v
<iframe height="</th" width="380"><th>"250" src="https://edshare.gla.ac.uk/268/</th><th>7/video template.html"</th></iframe>	"250" src="https://edshare.gla.ac.uk/268/	7/video template.html"

Once you are satisfied with the height and width of your video, scroll down and click on the 'Save and return to course' button.

Your embedded EdShare video should now be displaying within Moodle (as shown in the image above).
