

# How to find a book

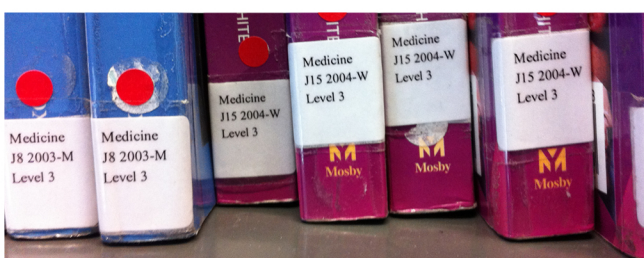

1. Look it up! You can do this at [www.lib.gla.ac.uk](http://www.lib.gla.ac.uk) or [m.lib.gla.ac.uk](http://m.lib.gla.ac.uk) on your smartphone.

2. Take a note of the Shelf Mark. This will look something like

**Anatomy qA8 2010-G**

3. The first bit of information is the section the book is in. These are marked on the map.
4. The second bit tells you where to find the book within that section. It works much the same as the normal alphabet, except some codes start with a small q. **Books with a small q come at the end of the regular alphabet.**
5. Books are then sorted by year, followed by letter.
6. You'll see a label on the spine of the book you needed with the same Shelf Mark code on it, which will make it super easy to put the book back when you're done!

*Happy library books*
